

Lash Lift / Tint Care Sheet

Can a Lash Lift be used to compliment other treatments?

Yes. A lash lift is enhanced when you use an eyelash growth serum such as Rapid Lash which is available at drugstores.

How long will a Lash Lift last?

A lash lift can last about a month but can vary from person to person. There is no need for any maintenance appointments in between but you will need to have the process repeated every 6-8 weeks to lift the new hair growth. There are some situations that may cause the lift to drop/weaken prematurely such as swimming, use of harsh products, steam or heat. If you find that your lift does not last, you can repeat the treatment after a minimum of 4 weeks of having the initial treatment.

How long will lash tint last?

Eyelash tinting treatment will last about 4 – 6 weeks. However, you can build upon your tints to keep the look from fading over time. To keep up the colour, avoid using oil-based moisturizers, cleansers or wipe as they will dissolve tints faster.

Can I wear makeup after my lash lift?

Yes, but it is advised that you leave your lashes untouched for at least 24 hours after your treatment. Please use a non-waterproof mascara as the removal of waterproof mascaras can be harsh on the lashes and weaken the lift.

How do I clean my eyes?

Gently using mild products. Always wait 24 hours to do this straight after the procedure.

How often can I have a lash lift?

A lash lift will begin to naturally drop after about 5 weeks and your lashes will be back to their natural look. The lashes should drop evenly and will not look out of place. You can repeat the treatment after a minimum of one month if you feel you need to or you can wait until they are back to their natural state.

- Be gentle with your lashes. For the first 24 hours, do NOT get them wet, do NOT touch them and do NOT rub them.
- Avoid working out, hot yoga, steam room and saunas within the next 48 hours. Avoid extreme heat.
- When showering, avoid facing the shower head directly on your lashes.
- Don't leave your lashes wet. After you shower, you can gently dry and shape your lashes using your hair dryer on the lowest and cold setting.
- Do not use a mechanical eyelash curler.
- Sleep on your back to avoid crushing your lashes in the pillow.
- Use an eyelash growth serum to help your natural lashes grow thicker and longer.
